

Schema Environment

1. Schemas are relational objects summarizing the features in a dataset including:
(Check all that apply)

- Feature misconfigurations
- Feature valency
- Feature type
- Feature name

2. As data keeps evolving, the ML platform of your choice should be resilient to:
(Check all that apply)

- High data volume
- Misconfigurations
- Disruptions from software
- Inconsistent Data

3. Your system and your development process must treat data errors as first-class citizens, just like code bugs.

- True
- False

Data errors should be treated as first class citizens, just like code bugs.
